## Rear tipping bodies S1G / S1H

### Unique in conus shaped bodies

All VS-MONT rear tipping bodies, half pipe, have a conus shaped design for better dumping of material out of the body.

**VS-mont**

#### Loading volume of the body:

from 6 - 25 m<sup>3</sup> (according to customers request)

#### Accessories calculated in the price of the tipping body:

- spare wheel holder on the front face – mechanical / rope
- tool box built in the protection cover of the body
- rear chute lath in the plane with the floor
- reflective marking of the body according to the regulation EHK no.104
- top coat in the required shade
- stabilizer of the body
- sound signalling of the tipping the body
- fitting of the body in the VS-mont factory

#### Tailgate design:

It is suspended on pins, it is opened by its own weight while tipping and it is secured and unsecured by mechanic draw bars (standard design).

#### Used materials:

HARDOX 450, STRENGTH, Steel ST52,3  
(material is sized according to the body volume and customer's request)

#### Accessories for extra charge:

- tailgate lifted hydraulically
- tailgate opened by means of chain mechanism
- body tarpaulin
- hydraulic spare wheel holder
- rear tiltable bumper
- change of material thickness
- aluminium mudguards
- vibrating system of the body (control from the driver's cab)
